# JOIN OUR EXPERTS' DATABASE!

CO-OP4CBD (Cooperation for the Convention on Biological Diversity) is a Horizon Europe project with the objective to engage a diverse pool of relevant expertise to support the EU in matters related to the Convention on Biological Diversity (UN CBD). To that end, this initiative is now establishing a dedicated expert database bringing together knowledge and experience related to this multilateral agreement.

## WHO CAN JOIN?

All specialists, researchers, practitioners and other stakeholders from EU Member States and Associated Countries working in biodiversity science, policy, implementation or related fields – whether already engaged in UN CBD processes or interested in contributing.

## WHY PARTICIPATE?

Participation in our database offers experts opportunities for learning, visibility, networking and contributing to science-policy processes linked to the UN CBD.

## WHAT WILL HAPPEN?

You will have the opportunity to join our training sessions, capacity-building workshops; as well as contribute to ongoing initiatives, dialogues, policy consultations and other activities that support knowledge exchange and strengthen links between science, policy, society and practice.

The database thus aims to facilitate expert mobilisation across UN CBD processes, enable technical and scientific cooperation, as well as contribute to broader science-policy initiatives.

This is a reflection of a central objective of CO-OP4CBD – the consolidation of relevant expertise on the road to enhanced coordination for implementing the Convention and its associated statutes and protocols across the EU.
